EDUCATIONAL PHILOSOPHY

I believe that the fundamental goal of being a teacher is to encourage and facilitate learning. Although I believe that all students are capable of learning, I also believe that a student needs to be willing to learn. With learning taking place in different circumstances and contexts, the classroom environment can encourage or discourage learning for each individual student so ensuring that the classroom facilitates learning is important.

Being an advocate for technology in the classroom and trying to be at the forefront of digital technology myself, I will use various and appropriate technologies as it will help students experience knowledge and construct new meanings.

TECHNOLOGY SKILLS

Productivity applications (proficient with Microsoft Word, Excel, Glogster, PowerPoint, SlideRocket, and Visio); ActivInspire; iPad Education Applications (AirSketch); FileMaker; Access; Illustrator; Photoshop; PC & Macintosh operating systems; web and email; Internet research; social media applications (Facebook, Twitter, and WordPress); basic website design and development
